

**AH08** The AH08 is a 20 turn winding of wire used to step up a 5 Amp CT signal for interface with any Enercept 100 Amp power meter. The 0-5 Amp signal is amplified to a level of 0-100 Amps and sensed by the current sensors of the Enercept power meter.

**Applications**

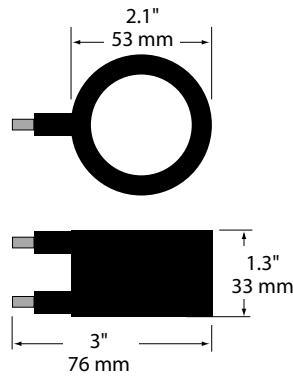

- Monitoring loads >2400 Amps with an Enercept power meter
- Stepping up a 5 Amp CT signal for use with any current sensor

**20 Wrap Step-Up Coil**
